#SCHOOLSTREETS
Making school environments healthier

Design a segregated and safe cycle lane network.

Move motor vehicles away from schools.

Improve pedestrian infrastructure to increase pedestrian convenience, safety and comfort.

Provide bicycle and scooter parking facilities.

Green the school grounds and surrounding areas.

Mark walking, cycling and public transport routes.

Improve public transport routes, frequency, signalling and accessibility.

Limit vehicle access and parking.

WHAT ARE THE BENEFITS FOR CHILDREN?

- Improves air quality
- Reduces noise impact
- Reduces heat impact
- Promotes healthy habits
- Fosters active and autonomous mobility
- Promotes social interaction
